#### **Narrative Summary**

The Governor's EFY13 Supplemental Budget proposals provide various funding adjustments to offset the \$35.5 million FY13 downward revision to General Fund revenue estimates in the December 2012 revenue forecast. Those offsets were initially implemented by the Governor's temporary curtailment of allotments. The Governor also needed to fund significant shortfalls in the Department of Health and Human Services, primarily in the MaineCare program.

The Governor's proposals generate more than \$153 million of General Fund resources from various savings initiatives (including the initiatives in the temporary curtailment), revenue enhancements and transfers from other funds. Approximately 70% of the total amount of savings initiatives relate to various items affecting General Purpose Aid for Local Schools and transfers from General Fund reserve accounts. The pie charts and tables on pages 2 and 3 provide more information on these proposals.

#### **Notes:**

<sup>1</sup> Reflects budgeted ending balance at the close of FY13 including all actions of the 125th Legislature and FY12 closing transfers and adjustments. The effect of the December 2012 Revenue Forecast is listed separately.

<sup>2</sup> This presentation presents a different look at the budget proposals from the traditional presentation of Budgeted Resources (net revenue changes and net transfers) less Appropriations. "Savings" initiatives include those items that increase resources: deappropriations; revenue increases; transfers from other funds; and other positive adjustments to balances. "Spending" initiatives include all those items that decrease resources: appropriations; revenue decreases; transfers to other funds; and other negative adjustments to fund balance.
